semirigid polishing wheels

**TRUELIFE**® is the name of the tool born from the experience acquired by **OMA System**® in sintering and electroplating processes that allows to realize a product able to offer the maximum results in terms of polishing. **TRUELIFE**® wheels represent the excellence in polishing because they are the result of the best characteristics taken from the **TRISTAR**® wheels and from the **DIALUX**® wheels.

From **TRISTAR**® wheels, **TRUELIFE**® wheels acquire the good point to have the **stiffness of the profile**. All this guarantees a **long life**, an **excellent polishing result** on every type of material and **uniformity of the profile**.

From **DIALUX**® wheels, **TRUELIFE**® wheels acquire the good point to have the **great adaptability and the softness** that make the use simpler. At the same time, **TRUELIFE**® semirigid wheels have eliminated the "old" polishing wheels defects, that are the **TRISTAR**® wheels absolute stiffness and the excessive softness and the detachment of the diamond cloths of **DIALUX**® wheels. New polishing wheels **TRUELIFE**®: the synthesis of excellence!

The main features are:

- ▶ **Great adaptability** to all kind of material
- ▶ **Extreme softness**
- ▶ Maintenance and **uniformity of the geometry** of the profile
- ▶ **Great polishing power**
- ▶ **Easiness of use**
- ▶ Excellent **Price/Life** ratio
